"My acne makes me feel insecure to the point that I don't want to go out with a big pimple on my face. Since I teach middle school it would be wonderful if I had less acne than my students."

"I have noticed a change in my skin since the first day I started using glō products. My skin started to smooth out after the first treatment and has continued to do so. The more I use glō products, the better my skin looks and the more confident I feel."

"My skin never stays consistently clear for more than a few days. My chin and forehead are the most problematic areas, and recently I have discovered some wrinkles around my mouth."

"After a few days, my skin began to, for lack of a better word, glow. The pimples around my chin began to subside as well. The biggest difference has been the massive reduction in breakouts. My skin is overall much clearer."

"I spent the majority of my youth trying to be as tan as possible and my skin has really paid the price. Texturally it is just rough and tough. I have fine lines everywhere along with spots of skin that are darker than the rest. "

"I have to admit, I'm really surprised. I didn't think that there was any hope for my skin but after these treatments I've seen the fine lines diminish and the dark spots go away completely. My skin is softer and younger looking than I thought possible. I'm ready for more!"

"Before I got my peels, I was very uncomfortable about all the spots on my face. I would not leave the house without a heavy coat of foundation and cover up on."

"Now every day I get compliments on how good my skin looks. Everyone has noticed the change and I now can just put on my sunscreen and go. I feel much better about my skin. It was the ticket!"

"When I was in high school having acne was pretty traumatic. I've battled with it continuously since I was 14 and even now in my late twenties. Adult acne is equally as frustrating since it seems to be something I can never outgrow. I'd like to feel good about my skin!"

"I've noticed that the texture is far less oily and generally feels much tighter and cleaner. The stubborn blackheads I've always carried around on my nose are greatly reduced, and the acne I experienced around my mouth is gone! I'd recommend glō to anyone and have certainly become a lifelong user."
